

GapVisor

AI Recommendation Visibility Platform — Project Overview

Confidential · Internal share · 21 September 2026 · GapVisor UI snapshots

Purpose

GapVisor helps B2B software teams see how AI assistants — ChatGPT, Claude, Gemini, Perplexity, and a customer-connected AI API — describe their brand versus named competitors.

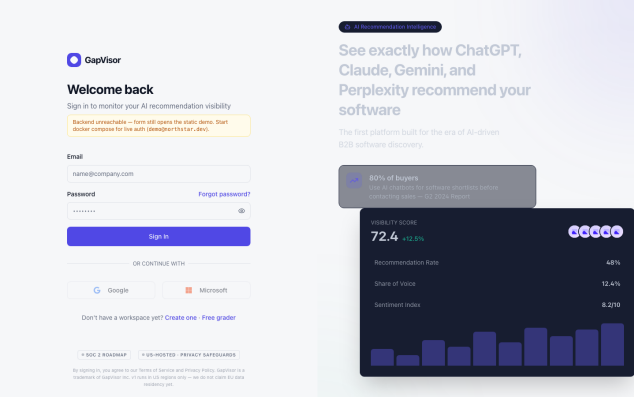

What has been built

10-screen SPA at visibilityos.ensarresearch.com plus FastAPI backend (auth, mock scans, metrics, recommendations, experiments, confidence, free grader).

Area	Delivered
Product UI	10 screens branded GapVisor: setup → monitoring → action → proof → billing
Backend	FastAPI auth, prompts, mock scan/parse/rollup, dashboard & confidence APIs
Artifacts	README gallery + this overview PDF refreshed with GapVisor screenshots

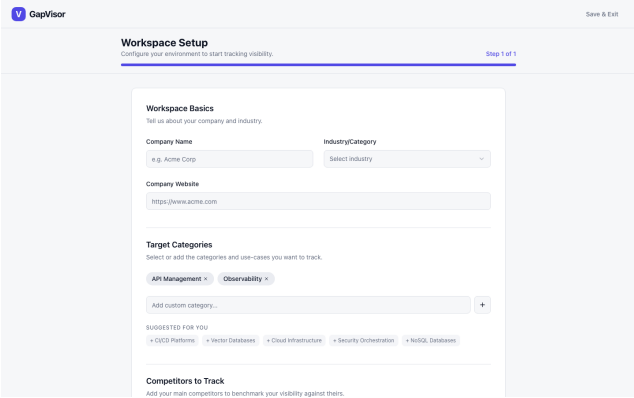

Feature snapshots — entry & core analytics

Sign-in

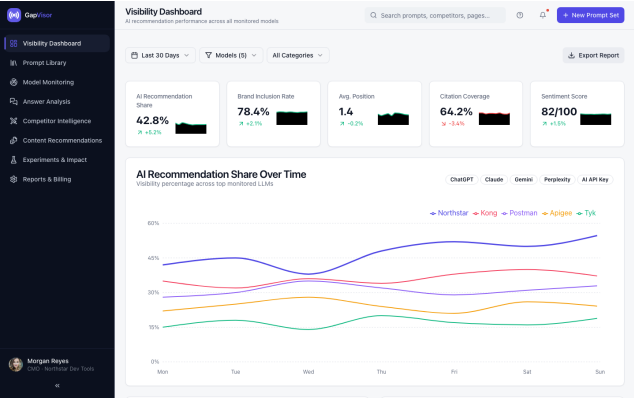

GapVisor authentication entry

Workspace setup

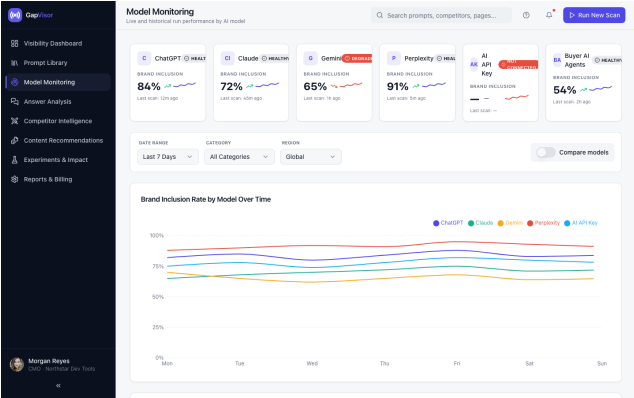

Brand, competitors, regions, cadence

Visibility Dashboard

KPIs, share of voice, alerts

Competitor Intelligence

Share of voice and battlecards

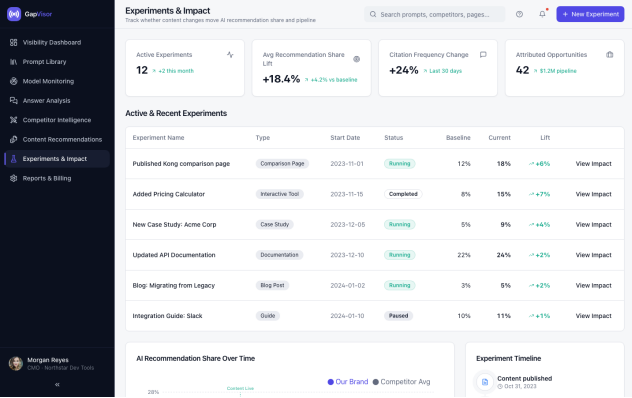

Content Recommendations

Prioritized actions with predicted impact

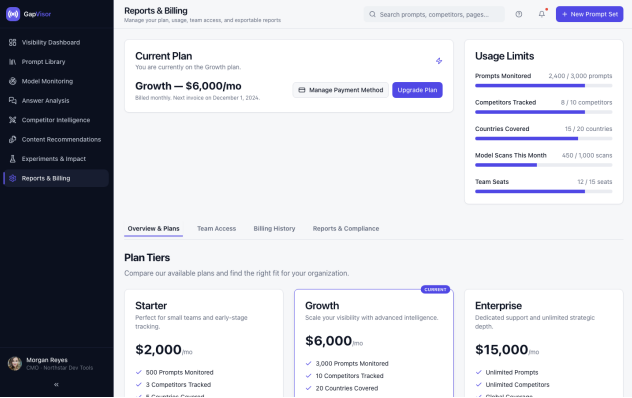

Feature snapshots — proof, commercial & GTM

Experiments & Impact

Before/after visibility lift

Reports & Billing

Plans, usage, team access

Free Visibility Grader (GTM)

The Free Visibility Grader (GTM) form is a public no-login diagnostic tool. It asks for the brand name and a list of competitors (comma-separated). The form includes a 'Get visibility score' button and a link to sign in for continuous monitoring. The form is branded with GapVisor.

GAPVISOR - FREE DIAGNOSTIC

AI Visibility Grader

One-shot score for how models talk about your brand. Not a statistically reliable sample — sign in for continuous monitoring.

Brand name

Northstar

Competitors (comma-separated)

Kong, Postman
